## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 30, the phrase "the first electrode and the second electrode comprise materials having different work functions with respect to each other" is not clear. Does this mean that the first electrode comprises a first material, for example, and the second electrode comprises a second material, where the first and second materials have different work functions? Or does this mean that each electrode comprises at least two materials, having different work functions from one another?
